### Resource Interpretations

The strict control employed by the Japanese Administration had a powerful impact on the local population of Micronesia. Take Palau as an example: The relationship between Japan and Palau dates back to 1929 when Japan took it over as part of its mandate. Under its administration, the islands of Palau witnessed economic prosperity: there was rapid growth in Fishery, Agriculture and Mining. Canneries during the period were known as the most successful manufactures the islands had ever experienced.
