

## YEAR 10 AGRICULTURAL SCIENCE WORKSHEET 4

*Attempt these questions at the back of your agricultural science book*

### Long Paragraph

#### **INSTRUCTION**

*Write a paragraph of 100 to 150 words on the questions given below. Each question is worth 5 marks.*

1. Explain **five** factors which farmers must consider when maintaining a disc plough.
2. Explain **five** factors that a farmer must consider before choosing inputs for an enterprise.
3. Discuss **five** factors that a farmer must consider before producing an agricultural commodity.
4. *Farm implements are expensive and must be stored in a proper manner. The table below shows the actions carried out by farmers in storing farm implements.*

Discuss the importance of each process.

	Descriptive Actions
1	Wash the implements after use
2	Oil or paint the implement
3	Store in a cool and dry place
4	Keep the implements under lock and key
5	Keep the implements away from children
