

Plate Tectonics: Processes and landforms

(a) Definitions Define any four of the following:

- | | |
|-------------------------------|---------------------|
| (i) clints | (ii) cliff collapse |
| (iii) lateral fault | (iv) geosyncline |
| (v) Mohorovicic Discontinuity | (vi) glacial trough |

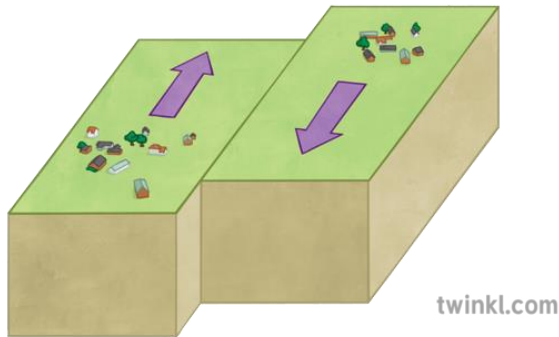

() _____

() _____

() _____

() _____

(b) Resource Interpretation Use the resource below to answer the questions that follow.

Source: <https://www.twinkl.com.br>

- (i) Identify the type of plate margin illustrated in the resource above.

- (ii) State the motion of plate movements in the plate margin in the resource above.

(c) Short Answer Questions

- (i) State a benefit and a hazard of tectonic processes.

- (ii) Explain how humans have used the glacial environment to their advantage.
